This document has been prepared by Forensic Applications Consulting Technologies, Inc. as part of an ongoing Motion for Judicial Review in response to actions by the CDPHE and pursuant to the provisions of C.R.S. 18-8-115 *Duty to report a crime - liability for disclosure*

INTRODUCTION

Forensic Applications Consulting Technologies, Inc. (FACTs) is performing a series of regulatory audits on public domain documents. This review pertains to the document identified as:

Methamphetamine Contamination
Real Estate Screening Assessment
1006 Gilfin Circle, Colorado Springs, Colorado 80915
Submitted by:
HEALTH AND ENVIRONMENTAL TECHNOLOGY (*sic*)
Robert M. Rodosevich
Senior Industrial Hygienist
Certified Clandestine Laboratory Specialist
Submitted to:
Mr. Rob Hoben
rob.hoben@me.com
March 23, 2015

For this document, although the title indicates the work was performed at 1006 Gilfin Circle, Colorado Springs, Colorado 80915, the opening sentence in the report states:

Health and Environmental Technology, LLC (HET) was contacted to conduct a methamphetamine screening at 1349 Hazeline Lake Drive, Colorado Springs, Colorado.

The most likely address to which the report pertains is 1006 Gilfin Circle, Colorado Springs.

The misspelling of the company name, "HEALTH AND ENVIRONMENTAL TECHNOLOGY" (*sic*) is taken directly from the report verbatim.

HISTORY

In the past, jurisdictions were reluctant to prosecute such consultants performing fraudulent work, who created serious problems by performing unlawful assessments, and falsely claiming the assessments were in accordance with State regulations and State Statutes.

Due to the serious problems thus created by such fraudulent consultants, of which HET was a frequent offender,^{1,2,3,4} Senator Lois Tochtrop promulgated Senate Bill SB13-219

¹ See for example, http://forensic-applications.com/meth/Farnsworth_Critical_Review.pdf (2045 Farnsworth, Colorado Springs, CO)

² See for example, http://forensic-applications.com/meth/Vondelpark_audit_censored.pdf (1299 Vondelpark Drive, Unit C, Colorado Springs, CO)

³See for example, http://forensic-applications.com/meth/Censored_HET_audit.pdf 7328 Franconia Drive, Fountain, CO

which was signed by Gov. Hickenlooper at the end of May 2013. That bill provided provisions that required the State of Colorado to develop standards for performing screening evaluations for properties involved in Real Estate transactions and for the licensing of authorized Industrial Hygienists involved in the work, including disciplinary actions against those who violated the regulations.

In the past, fraudulent consultants knew there was little chance of any retribution for violating State regulations and they could continue to cheat consumers with impunity. SB13-219 therefore, heavily modified Colorado Revised Statutes and placed in those statutes provisions for disciplinary fines for consultants who violate the State regulations.

Colorado Revised Statutes: 25-18.5-107. *Enforcement*

(1) A person that violates any rule promulgated by the board under section 25-18.5-102 is subject to an administrative penalty not to exceed fifteen thousand dollars per day per violation until the violation is corrected.

The new regulations were Adopted by the Colorado Board of Health on October 15, 2014, and the new regulations became effective on December 15, 2014.

FACTs has reviewed the report by HEALTH AND ENVIRONMENTAL TECHNOLOGY (*sic*) (HET), and have identified no fewer than 19 violations of State regulations in the performance of the methamphetamine screening assessment at the subject property.

DETAILS OF VIOLATIONS

Violation of Section 3.0

In his report, Mr. Rodosevich states:

This real estate screening was conducted in accordance with the Screening Level Assessment procedure as described by CRS 6 CCR 1014-3 and § 38-35.7-103.

According to mandatory regulations:

3.0 Screening Level Assessment of Properties not known to be methamphetamine-affected properties. This section establishes procedures and standards for testing residential real property pursuant to § 38-35.7-103, C.R.S. Screening level assessments pursuant to this section are for the purpose of determining if the subject property is a methamphetamine-affected property. The procedures in this section are not to be used to make clearance decisions.

⁴ See for example, http://forensic-applications.com/meth/Reg_audit_shady_crest.pdf 539 Shady Crest Circle, Colorado Springs, CO 80916

3.5 The Consultant shall conduct limited composite wipe sampling of the structure(s) for methamphetamine (including fixtures, as appropriate), in accordance with Section 6 of this Part 1.

As described below, HET failed to collect samples pursuant to Section 6 of this Part 1.

Violation of Paragraph 6.2

6.2 Discrete Wipe Sample Collection Procedures. The following procedure shall be used for collecting discrete wipe samples:

6.2.4 Wet the sample media with isopropanol to enhance collection efficiency.

In his report, Mr. Rodosevich states:

Each gauze pad is moistened with reagent grade methyl alcohol.

Violation of Paragraph 6.2.14.2

According to mandatory State regulations:

6.2.14 Maintain a Chain-of-Custody Record covering the time of sample collection through final disposition. ... At a minimum, the Chain-of-Custody Record shall include the following:

6.2.14.2 subject property address;

On the submitted chain-of-custody, Mr. Rodosevich failed to provide the subject property address as required by regulations.

Violation of Paragraph 6.2.14.3

6.2.14.3 sampler name and contact information;

On the submitted chain-of-custody, Mr. Rodosevich failed to provide the name of the sampler (since the sampler has not been identified, it is therefore impossible to have provided contact information for the sampler).

Violation of Paragraph 6.2.14.6

6.2.14.6 number of sample aliquots;

On the submitted chain-of-custody, Mr. Rodosevich failed to provide the number of sample aliquots as required.

Violation of Paragraph 6.2.14.7

6.2.14.7 number of containers for each sample

On the submitted chain-of-custody, Mr. Rodosevich failed to provide the number of containers for each sample.

Violation of Paragraph 6.2.14.8

6.2.14.8 sample collection time and date;

On the submitted chain-of-custody, Mr. Rodosevich failed to provide the time of sample collection as required.

Violation of Paragraph 6.2.14.9

6.2.14.9 sample matrix

This information is missing from Mr. Rodosevich's chain of custody.

Violation of Paragraph 6.2.14.11

6.2.14.11 sample preservatives

This information is missing from Mr. Rodosevich's chain of custody.

Violation of Paragraph 6.7.1.1 (four violations)

According to mandatory State regulations during real estate screening, the consultant shall collect:

6.7.1.1 a minimum of two (2) 4-aliquot composite samples must be collected, with at least one aliquot being collected from each room. At least one composite sample must include an aliquot from the cold air return of a heating system, if it is a forced air system.

In his report, Mr. Rodosevich identifies 11 rooms from which samples are to be collected:

Bedroom #4
Bedroom #5
Downstairs bathroom
Family room
Upstairs bathroom
Bedroom #1
Bedroom #2
Bedroom #3

Garage attached
Garage detached
Living room /Kitchen

Of the 11 rooms from which a sample was supposed to be collected, Mr. Rodosevich only collected a sample from the following rooms:

Upstairs bathroom
Bedroom #1
Bedroom #2
Bedroom #3
Garage attached
Garage detached
Living room /Kitchen

In violation of 6.7.1.1, samples were not collected from the following rooms:

Bedroom #4
Bedroom #5
Downstairs bathroom
Family room

In violation of 6.7.1.1, no samples were collected from the cold air return of the furnace.

Violation of Paragraph 6.7.1.2 (four violations)

According to mandatory State regulations during the screening evaluation, the consultant shall collect a sample from:

6.7.1.2 All exhaust fans (including, but not limited to, kitchen, bathrooms, attic vent fans, or whole house exhaust fans) must also be sampled. Exhaust fan samples shall be collected from inside the fan compartment, the fan blade, or the back side of the fan grill. A separate surface sample does not need to be collected from any room from which a fan or ventilation system sample is collected.

Failure to collect a sample from the exhaust fan in the up-stairs bathroom.
Failure to collect a sample from the exhaust fan in the down-stairs bathroom.
Failure to collect a sample from the attic exhaust fan.
Failure to collect a sample from the kitchen exhaust fan.

Violation of Paragraph 3.7

According to mandatory State regulations, the Consultant is required to include specific information in their report.

3.7 Information collected during the screening level assessment shall be documented in a Screening Level Assessment Report and shall include, but not be limited to, the following, to the extent available and applicable:

Violation of Paragraph 3.7.5

According to mandatory regulations, the Consultant is required to provide:

3.7.5 Photographic documentation of property conditions.

In his report, Mr. Rodosevich does not provide photographic documentation as required; for example, there are no photographs of the kitchen, there is no photograph of either of the two attics, there is no photographic documentation of the furnace system, or ceiling fans.

Violation of Paragraph 3.7.6.3

According to mandatory regulations, the Consultant is required to provide

3.7.6.3 results of sampling, including a description of sample locations and a computer generated figure illustrating the layout of the building(s) and sample locations and identification. Sample results shall be presented as reported by the analytical laboratory, and shall not be adjusted, changed, or manipulated in any way. Spiked samples submitted for analysis shall not be used for purposes of compliance with the regulation.

No computer generated graphics of sample locations were included in HET report as required. No computer generated graphics of samples locations were identified.

CONCLUSION

FACTs has reviewed the report by HEALTH AND ENVIRONMENTAL TECHNOLOGY (*sic*) (HET), and we have identified no fewer than 19 violations of State regulations in the performance of the methamphetamine screening assessment at the subject property that have been ignored by the CDPHE. If we were to include the number of individual violations seen with each sample, the number of violations would greatly exceed that reported here.

Appendix A

Statement of Qualifications

Forensic Applications Consulting Technologies, Inc. Consultant Statement of Qualifications

FACTs project name:	Web	Form # ML15
July, 2015		

Caoimhín P. Connell, has been involved in clandestine drug lab investigations since 2002 and meets the Colorado Revised Statute §24-30-1402 definition of an "Industrial Hygienist" and is authorized under 6 CCR 1014-3 to perform assessments in illegal drug laboratories. He has been a practicing Industrial Hygienist since 1987. Mr. Connell is a recognized authority in drug-lab operations and is a Certified Instructor in Meth-Lab Safety through the Colorado Regional Community Policing Institute, CRCPI (Colorado Division of Criminal Justice) and was the lead instructor for the CRCPI providing over 260 hours of methlab training for over 45 Colorado Law Enforcement Agencies, federal agents, probation and parole officers throughout Colorado judicial districts. He has provided meth-lab lectures to the US Air Force, the National Safety Council, and the American Industrial Hygiene Association (of which he is a member and serves on the Clandestine Drug Lab Work Group and for whom he conducted the May, 2010, Clandestine Drug Lab Course, and is a coauthor of the AIHA methlab assessment publication.)

Mr. Connell is a member of the American Conference of Governmental Industrial Hygienists, the Occupational Hygiene Society of Ireland, the Colorado Drug Investigators Association, an appointed Member of the National Fire Protection Association, and the ASTM International Forensic Sciences Committee, (where he was the sole sponsor of the draft ASTM E50 *Standard for the Assessment of Suspected Clandestine Drug Laboratories*).

From 2009, Mr. Connell served as the Industrial Hygiene Subject Matter Expert on the Federally funded Interagency Board (Health, Medical, and Responder Safety SubGroup), and was elected full member of the IAB-HMRS in 2011 where he now serves. He is the only private consulting Industrial Hygienist in Colorado certified by the Office of National Drug Control Policy High Intensity Drug Trafficking Area Clandestine Drug Lab Safety Program, and P.O.S.T. certified by the Colorado Department of Law.

He has received over 194 hours of highly specialized law-enforcement sensitive training in drug lab operation, and under supervision of the US DEA, he has manufactured methamphetamine using a variety of street methods. He has received highly specialized drug lab assessment training through the Iowa National Guard, Midwest Counterdrug Training Center and the Florida National Guard Multijurisdictional Counterdrug Task Force, St. Petersburg College, Rocky Mountain HIDTA, as well as through the US NHTSA, and the U.S. Bureau of Justice Assistance (US Dept. of Justice) and he is currently ARIDE Certified.

Mr. Connell is a current sworn law enforcement officer who has conducted clandestine laboratory investigations and performed risk, contamination, hazard and exposure assessments from both the law enforcement (criminal) perspective, and from the civil perspective in residences, apartments, motor vehicles, and condominiums. Mr. Connell has conducted over 594 assessments of illegal drug labs in CO, SD, NE, OK, and collected over 5,378 samples during assessments (a partial detailed list of drug lab experience is available on the web at): <http://forensic-applications.com/meth/DrugLabExperience2.pdf>

He has extensive experience performing assessments pursuant to the Colorado meth-lab regulation, 6 CCR 1014-3, and was an original team member on two of the legislative working-groups which wrote the original regulations for the State of Colorado and he was the primary contributing author of Appendix A (*Sampling Methods And Procedures*) and Attachment to Appendix A (*Sampling Methods and Procedures Sampling Theory*) of the original Colorado regulations. Mr. Connell strongly objected to the unscientific, unfounded and inappropriate amendments now applicable to those original regulations.

Recommended by the US NIOSH as Peer Review Expert for the NIOSH 9109 Method, *Methamphetamine*, he has been admitted as a drug lab expert in Colorado, and an Industrial Hygiene Expert in Colorado in both civil and criminal courts as well as Federal Court in Pennsylvania. He has provided expert testimony in several criminal cases including Grand Jury testimony and testimony for US Bureau ATF and he testified before the Colorado Board of Health and Colorado Legislature Judicial Committee regarding methlab issues. Mr. Connell has provided services to private consumers, Indian Nations, State Investigators, and Federal Investigators.

Consultant Interim Authorization Approval

Dear Caoimhin Connell:

The Hazardous Materials and Waste Management Division of the Colorado Department of Public Health and Environment (the Department) has reviewed the application for Consultant Interim Authorization and has determined the application to be complete and in compliance with 6 CCR 1014-3, Regulations Pertaining to the Cleanup of Methamphetamine-Affected Properties (the Regulations).

The Department approves the application for **Consultant Interim Authorization**. This interim authorization approval shall expire on June 15, 2015.

Assessment and sampling of methamphetamine-affected properties may only be conducted by Consultant Firms that have received interim authorization under Part 2, Section 3.2.4 of the Regulations. Therefore, this interim authorization may only be used to conduct assessment and sampling of methamphetamine-affected properties for a Consultant Firm that has received interim authorization approval from the Department.
